

Secara Fisik Jumlah Hardisk 14 Unit dengan konfigurasi raid 5, yang terditeksi ada 13 Hardisk :

- 1 (satu) unit hardisk dengan keterangan error gambar warna kuning (ID 2 LUN0) sebagai mana gambar dibawah;
- 1 (satu) unit hardisk dengan keterangan missing dengan gambar tanda silang berwarna merah (ID 0 LUN 0) Sebagai mana gambar dibawah.

Status Volume Tanda Silang dan Tidak Bisa Diakses

Terdapat Status Error Pada Hardisk Dengan **ID 2 LUN 0**

The screenshot shows the Windows Disk Management console on the left and the DiskPart properties window on the right. The Disk Management console displays a RAID 5 volume (Disk 1) with a capacity of 1.36 TB, which is currently in a 'Failed' state. The DiskPart properties window is open for the volume 'COMPAG BD1468B27E SCSI Disk Device'. It shows the drive letter 'G:', the partition type 'Basic Data', and the volume label 'RAID5'. The 'Status' is 'Failed'. The 'Volume Information' tab is selected, showing the volume is 'Not formatted' and 'Not active'. The 'Disk Information' tab is also visible, showing the disk is 'Not initialized' and 'Not active'. The 'DiskPart' window has a 'Troubleshoot' button at the bottom.

Terdapat Error Missing pada hardisk **ID 0 LUN 0**

[illegible]
